## Crammed with powerful features A few of the features that come standard with our platform

### Blazing-fast site speed

Get impressive load time on every site, backed by the Google Cloud Platform. No configuring needed!

### Free CDN + custom caching

Easily add a CDN to your site and rest assured our specific caching is making your site fly.

### Free SLC Included

Skip third-party providers and install SSL right from your site's dashboard!

### **Optimized for WordPress**

From our servers to our support team, we're focused on our favorite platform, WordPress!

#### Hacker-free security

We'll keep your sites safe and secure. And if they do get hacked, we'll clean 'em up for free!

#### Easy SFTP access

One login gives you access to all your sites. We've simplified SFTP while keeping your data extra secure.

#### Staging for every site

Make changes in a test environment before going live, without setting up servers or plugins.

#### Powerful dev tools

Our platform features built-in tools to speed up site creation, for solo creators and teams.

### 'The pain points of stability, security and performance have completely been taken care of now'

Ken Seibt - Koh Jum Beach Villas

### 10,000+ Hoteliers Worldwide From independent hotels to big brand properties, our powerful digital platform will super-power your hotel's online performance

THE ATHENEE HOTEL BANGKOK

# Real-time support from real humans

Our team is spread across the world to give you helpful answers however you need them, regardless of what time zone you're in or what time you're working

24/7 Live Chat & Support Tickets

# Reliable security against hackers and malware

Our rock-solid platform was carefully crafted from every angle to protect your hotel website from threats. That means no more stressing about security plugins and far more peace of mind!

#### Free Malware Cleanup

If hackers do get ahold of your site, we won't make you upgrade plans or pay a fee. We'll just fix it, because that's what a great host should do.

#### Wordpress Updates

We'll take care of major and minor WordPress updates, keeping your site safe from security threats due to outdated versions.

### Nightly Backups

We'll store backups of your site on a separate server for 30 days. Need to rollback? It's an easy one-click restore!

### Staging / Development Site Make changes to your live site without the stress

### Push & Pull Changes

No more manually copying themes and plugins from a test server to production. With a single click, you can move changes from your live site to staging or, why not, vice versa.

### Intelligent Merging

You get to decide whether you want to move just the themes and plugins or if you also want to include the database. Either way, we merge your uploads and make sure that you never lose any of your changes.

#### Test New Plugins

Most plugin updates go smoothly. But for important sites, you want to make absolutely sure that the latest version of a plugin isn't going to break anything. Test them out with a staging site. There'll be less downtime if anything does go wrong, and we promise it won't affect any of your live users.

### Safely Update Wordpress

New versions of WordPress have a tendency to break sites, it's true. But you don't have to worry about that, because our staging sites let you test out new versions with no commitment.

# **FOISLIV**®

## Blazing-fast Site Speed! Get impressive load time every time

Your site will likely be noticeably faster due to upgraded PHP, our FlyCache technology, and our totally rebuilt infrastructure that leverages Google Cloud's global network. Our uptime on the new platform is also incredible due to auto-healing technology (you're lookin' at 99.9%)!

### We'll move your website for free! Migrate your site free of charge double time
